DANCE**

Monitoring

- We use our In-Ears in connection with our X32 Rack.
- Please put 1 monitor-box on the stage for the song „I want it that way“. Please mix guitar and vocals on it.

Stage Order

- We bring our Monitor-Rack (Behringer X32 + Ultralink MS8000), our instruments (drums, sampler, bass, guitar and keyboard), and our banner to the venue.
- Is it possible to put our banner (3m x 1m BxH) in the back of the stage? Or can you beam it on a screen?
Logo Download: <https://tiny.cc/cdlogo>
- PA and Lights have to fit the location. We need enough electricity and cables on stage.

Helping Hands

- 1 person who helps us getting our stuff out off the car to the stage at arrival.
- 1 person who helps us getting our stuff back in the car after the show.

Catering

- 5 hot meals (2 vegetarians)
- 1 box of still water ON STAGE and 1 box of malt beer/cola/juice/beer BACKSTAGE
- Snacks and fruit BACKSTAGE

Other important things

- We need a clean checkroom with a mirror, towels, table and chairs which we can LOCK and which is NO SMOKING area
- It has to be possible to transport our stuff on the shortest way to our car/bus directly after the concert
